

Municipal District Sets Mill Rate

The tremendous increase in school operating costs and the loss of the personal property assessment will be reflected in municipal tax notices now being prepared at the offices of the M. D. of Mt. View No. 49 here in Didsbury.

Although final estimated receipts and expenditures have not been set, the M.D. Council has progressed to such a stage that various mill rates have been struck.

They are as follows:

Municipal	23
School	27.6
Hall Area	6.5
Hospital:	
Olds	4.5
Didsbury	5.75
Calgary	4
Three Hills	6
Innisfail	4.5

Further meetings of the M. D. Council will be held to complete all the estimates.

No major municipal program is foreseen in 1959, but the Council will continue its policy of providing better roads and other facilities for the municipal taxpayer.

LONG WEEKEND COMING UP...

This year the Queen's birthday will be celebrated on Monday, May 18th. Most retail stores and other places of business across the country will be closed on that date. If your Pioneer is a few hours late next week blame it on the fact that we too enjoyed a day off.

Fish And Game Group Have Derby Underway

The following is a few notes received from the local Fish and Game Association:

Wanted: Crow and Magpie feet. Five cents a pair will be paid if you drop them in at Jay Tuglie's. Besides the main prize of a rifle there will be four other prizes for those who gather in the most feet in this competition.

It is suggested that you get your raffle ticket now on the Coleman camp store from any Fish and Game member, or at Campbell's Food Store. Proceeds will go for the Fish Pond.

The Fish Derby is now underway. All fish are to be weighed at Ray Campbell's. Anyone under the age of 18 years can enter fish in the derby; they do not have to be a member of the association. A special prize will be given to the boy or girl catching the largest sucker. Several large fish have already been brought in.

Why Not Extend the Line?

We understand that the water and sewage line will be put through to the new curling rink, now under construction, but no arrangements have been made to go the few extra yards to the arena — does this make sense to you? At the present time sanitary conditions in the arena are far from good and the ever present fire hazard is on hand at all times. Shouldn't the Arena Board and the Town Council get together on this deal. Our Memorial Arena could be closed down for obvious reasons, or it could be burnt down because the water didn't arrive on time — either way 't would be a big loss; something should be done about the situation, but now!

If you're an employer or an employee your "donations" to the unemployment insurance fund are going to take a fast jump. "Dief" and his boys intend to nab you for a 30 percent increase in this department. Average benefits will be the same, but if you happen to be serving a jail term you can now collect unemployment insurance for up to two years. Must sound good to those behind bars — free room and board, no laundry bills, fresh linen, and the honest "Joe's" kick in approximately \$1500 a year from their donations to the unemployment insurance fund. Make's a fella' wonder, doesn't it?

CHURCHILL GOES TO WASHINGTON

The cold war between Russia and her satellites, aided and abetted by Red China, and the Western world has kept people in a high state of tension for many months. The illness of John Foster Dulles and his eventual resignation, to be followed in the office of Secretary of State by Christian Herter, has kept the American and Canadian people wondering.

Now we find Sir Winston Churchill in Washington conferring with President Eisenhower, and the world will be wondering what they talked about.

The Western world cannot afford to let Russia dictate all the terms for the future. This should not necessarily mean a fighting attitude.

— Camrose Canadian

PSYCHOLOGICALLY RIGHT!

When a young farm wife came down to make breakfast she found her husband had been on the rampage in the kitchen with a fly-swatter. "Got 'em all," he said, "six females and five males."

"Huh," his wife snorted, "how can you tell?" "Nothing to it," he grinned, "five were trying to get in the cupboard and six were on the mirror."

SERVICE BOARD NOTES

GOPHERS are on the increase. Both the pocket gopher or mole, as well as the prairie gopher, are being encountered in increasing numbers. It is a simple matter to mix up a batch of oats or wheat with the prepared gopher poison and then place a spoonful or two at each burrow. Several grains of this poisoned oats or wheat will kill quickly and effectively.

Pocket gophers make a real nuisance of themselves, especially in hay fields and around gardens and lawns. Frequently I am asked how to cope with them. They can be trapped or poisoned. Straychintle alkaloids dusted over carrot or parsnip cubes in a close container is an excellent bait. A quartet of an ounce of strychnine will treat one gallon of vegetable bait. Two of these cubes placed in the runway of each group of 10 to 15 mounds will be sufficient to kill the gopher living there. It is only occasionally that two or more animals will occupy the same burrow system.

Cynogas can also be used for this purpose. Probe around with a sharpened rod or stick until you find the main burrow. Drop a spoonful of the crystals into this hole, pour a bit of water on and close up the hole. Moisture puts the crystals to work, releasing the deadly fumes that follow the burrow to its end and gas the mole or pocket gopher.

Whether you use dried vegetables treated with strychnine or the Cynogas method, it will be necessary to probe around and find the main burrows. This may be a rather tedious job but results obtained are gratifying.

EVER LOSE YOUR CAR KEYS?

What a fix to be in! But you don't need to worry if you have a War Amps Key Tag on your key chain. Every 36 minutes somebody loses their car keys and sets them safely returned, all because motorists sent 35 cents to the War Amps after receiving a War Amps Key Tag in the mails. Have you received yours yet? You will soon. When you do, send 35 cents and save yourself some awkward hours. The address is 740 Bay Street, Toronto. For 60 cents you can have a duplicate key tag.

Delivery Prospects Look Bright?

It is being freely predicted that prairie farmers will be able to deliver all their marketable grain before the present crop season ends on July 31st.

No doubt this will hold true for most of the West and in some areas farmers are already scraping the bottoms of their bins. Nearly 40 points in Alberta are now designated as "limited" indicating that no further quota increases are required this year and many others are probably approaching this condition.

But over a wide area in southern Alberta and southwestern Saskatchewan, a concerted effort will be needed to provide more shipping orders and boxcars if farm-held stocks are to be cleared up by the year end. Crops in these areas have been heavy in recent years and on large farms in particular, heavy stocks have accumulated. Unless the rate of shipping can be speeded up materially, there is likely to be a fair-sized farm carry-over remaining in these areas at the end of the crop year despite the optimistic predictions.

For most farmers in the West less grain will remain on their farms than since the surpluses started to accumulate back in 1951.

"OVER SEVENTY" MEMBERS HONORED BY W.I.

Mrs. Baudistel was hostess for the May meeting of Westcott Sr. W.I. at which roll call was answered by "A characteristic of a good citizen." Mrs. Burr Tugue was chosen as a delegate to the Edmonton convention.

The Canadian Association of consumers was the topic considered and membership was taken out by the W.I. Mrs. Macfarlane, in her five-minute talk, spoke of the grant of \$10,000 made to the institute by the federal government.

Highlight of the afternoon was a presentation of corsages to each of the four members over 70 years of age. Mrs. Baudistel, Mrs. Kinkead, Mrs. Levaagood and Mrs. Macfarlane were the honored ones. Mrs. J. Luft also received a corsage; she has had perfect attendance for the past eight years.

NOTES FROM

The

District

Agriculturist

HOWARD

FULCHER

Brood sows to produce thrifty litters must receive ration which will provide enough nutrients to develop the unborn pigs and maintain their own body in a healthy state. It is essential that the ration have sufficient protein, adequate amounts of mineral and a plentiful supply of vitamins. Sows should get sufficient feed to stay in a thrifty condition, avoid feeding too liberally or they will become over-fat.

A sow will consume about 60 bushels of grain in one year along with 500 pounds of alfalfa and 50 pounds of supplement. Salt required will be approximately 12 pounds and a similar amount of limestone (calcium).

A grain mixture of oats and barley will make the best ration, to this a protein supplement must be added. The minerals may be added to the feed or fed free choice, salt and calcium are ready at hand. Lacking will be A and D, these both will be supplied if the sows get good alfalfa hay about 10% of their feed intake. Alfalfa pasture, if sufficient, will be satisfactory in the summer. If neither alfalfa pasture or hay is available vitamins must be supplied from other sources. Additional iodine will be required by pregnant sows. It should be fed for the last 12 weeks of pregnancy.

Good pasture is important for brood sows giving a supply of protein, vitamins, and exercise and invariably resulting in larger better litter. During the winter months or if pasture is not available feed some distance from shelter so the sows will exercise. Have plenty of fresh water available at all times. When sows are heavy in pig do not force them to travel through obstacles such as erecks, broken fences, snow banks or across icy areas.

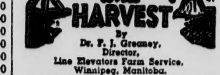

The feeding and care of the brood sow can easily make the difference between profit and loss in the swine enterprise.

SEED TREATMENT

A SOUND INVESTMENT

The treatment of seed grain — wheat, oats, barley and flax — is the best and cheapest form of crop insurance that can be bought today. Why? Because effective seed treatment prevents smut and other seed-borne diseases of grain crops. It also protects seed and young seedlings from soil-borne organisms that cause seed decay and seedling blight and checks soil-borne insects, particularly wireworms. It thus helps to establish stronger stands and to produce bigger yields of better quality grain crops.

Approved Chemicals. Chemicals containing mercury (Agro-C, Corosan M, Leytossan, Melasol, Panogen, and others) are more generally effective for treating the seed of cereals and flax than any other class of compounds. Where wireworms as well as smut and other diseases are to be controlled the dual-purpose or combination treatments (Almer, Mergamma C, Leytossan G, and others) are recommended.

Treatment Facts. It is good insurance to treat seed of wheat, oats, barley and flax every year. The seed should be thoroughly cleaned first, and then properly treated with an approved seed treatment. It is important that thorough and uniform mixing of chemical and seed is essential for best results. Time of treatment is also important. Unless otherwise specified by the manufacturer, seed of wheat and flax should be treated at least 24 hours before it is sown, and oats and barley at least one week in advance of seeding. Don't overdo the seed. Follow carefully the "government approved" directions given on the label of the chemical container.

Poison Warning. Mercury is poisonous. Under no circumstances may mercury-treated seed be offered for storage or sale at a licensed commercial elevator. Neither should it be fed to livestock. In treating seed observe strictly the cautions given on the labels.

Yes, seed treatment is a sound investment. Plant only cleaned, treated seed in 1959.
